

Project 2 Concept Assignment

Submit a brief concept document (about 1 page) where you detail what you want your Project 2 to look like. You should review the information presented to you on the assignment overview and options sheet and decide what kind of analysis you want to pursue.

Your concept document should include the following:

1. What multimedia artifact are you considering for analysis? Share some details and why you're interested in working with it.
2. What makes this artifact a multimedia artifact? Describe a few things that make your chosen artifact fall under the definition of multimedia.
3. How do you want to compose this report? What format are you envisioning for presenting your information about this multimedia artifact?

Submit your concept on Brightspace by **Friday, September 25th** at 11:59pm. It is worth 15 points.

You will receive feedback from me that will include suggestions for completing your project successfully, as well as the scope and length of your project. Remember that this is just a concept, and it can shift and change as you move through the next month and engage with media demonstrations and research. This is your starting point.
